

Java

```
class Solution {  
    public int maxValuE(int n, int index, int maxSum) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {number} n  
 * @param {number} index  
 * @param {number} maxSum  
 * @return {number}  
 */  
var maxValuE = function(n, index, maxSum) {  
  
};
```

C++

```
class Solution {  
public:  
    int maxValuE(int n, int index, int maxSum) {  
  
    }  
};
```

C#

```
public class Solution {  
    public int MaxValue(int n, int index, int maxSum) {  
  
    }  
}
```
